

Le réseau NS-PARK lauréat du 1er appel à projets lancé par la DREES

NS-PARK Network: Predicting individual trajectories of Parkinson's patients

The NS PARK project: predicting the individual trajectories of parkinsonian patients "is one of the 10 winners of the first call for projects launched by DREES as part of the" Health data hub ".

This project involves two F-CRIN labeled networks, the NS PARK clinical investigation network and the RECaP network of expertise.

This is a first step and the confirmation that F-CRIN is a future-oriented infrastructure that is firmly focused on the future and the challenges of clinical research of today and tomorrow.

List of winning projects:
